# ABOUT US

Amba Safety is an ISO (9001:2015) certified company & since last two decades we are a pioneer in solvents & chemical business. We also deals in import, manufacturing & trading of all kinds of thermoplastic paint, traffic signages & road safety products. Since 2009, We have been providing quality products & services in the entire range of thermoplastic paint, traffic & road safety Signages.

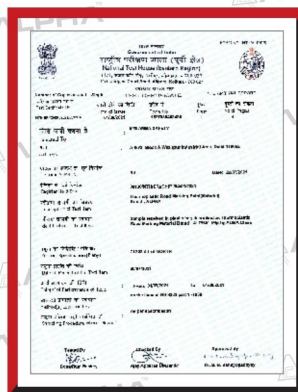

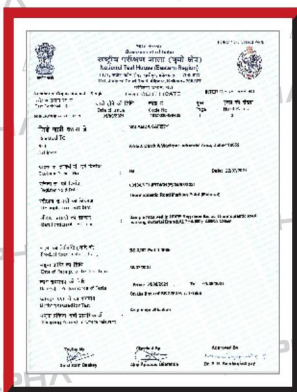

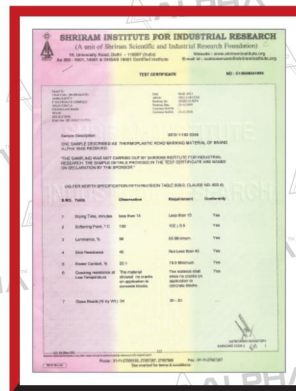

We are proud to be a part of several road safety projects & regularly have deals with govt. contractors dealing with NHAI, Indian Railways & other Road Construction company.

Our company providing best quality thermoplastic road marking paint for road safety is our motto.

We Offer Complete road safety solution to our clients & real value for their money by offering best suited products at most reasonable pricing.

## OUR CERTIFICATIONS

**A**mba Safety focuses on developing the road safety and providing products related to road safety. We manufacturer products im compliance with the international standard and fulfilling environmental requirements. Keeping up to our commitments is the best service we provide.

Focusing on the final product, Amba Safety also looks for the betterment for the environment and the operating conditions.

## ROAD MARKING

When it comes to Roads, interchanges, airports, hospitals, schools and any other place along our routes in life, we don't always think about how they are constructed or the science behind how they work, we just expect them to. That means every country, government, contractor, architect and engineer needs the right tools at their disposal to make sure the communities under their watch are protected by high-quality, well thought out infrastructure that keeps them safe and the world running smoothly.

That's way every Amba Safety product and application is designed for quality Quality that ensures safety reliability and clarity no matter the project. Road markings are usually considered to be ornaments for the road, this is said due to its visibility and reflected during day and night.

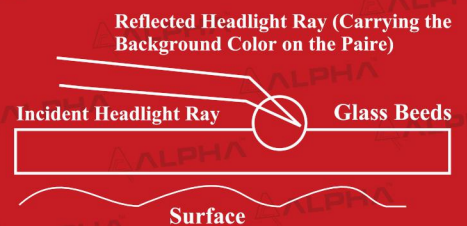

# HOT-APPLIED THERMOPLASTIC

Amba Safety manufactures and supplies a full line of durable thermoplastic products in hydrocarbon formulations engineered to meet your specification whether under National Highways, State Highways, Rural and Urban roads. It is also designed for different weather conditions and road surfaces.

Thermoplastic pavement making material is a 100% solid, environmentally and user safe compound containing pigments, glass beads, binder and filler which becomes liquid when heated. In liquid form, the thermoplastic may be applied using standard industry applicators including hand liners and truck mounted equipment. Intermixed and drop-on glass beads provide retro reflectivity for night-time visibility of the pavement making.

# GLASS BEADS

Pavement making retro-reflectirizations is accomplished through the use of glass beads partially embedded on the surface of the pavement making material. Light rays entering the glass beads are retro reflected back to the driver to significantly improve pavement marking visibility in low light situations. Amba Safety recommend top in class Drop on Glass Beads which are well known, namely Sovitec Drop on Glass Beads and Potters Drops on Glass Beads. These are amongst the best round the globe.

# QUALITY

Amba Safety is ISO 9001:2015 certified. This certification includes all of our corporate, R&D and manufacturing locations in INDIA. ISO 2015 certification demonstrates our ability to consistently provide products and services that meet customer and applicable statutory and regulatory requirements. Our commitment to this level of certification reflects our desire to enhance customer satisfaction through the effective application of the quality management system, including on-going processes for improvements.

# RESEARCH & DEVELOPMENT

Our Science & Technology centre supports major innovation initiatives for Amba Safety with world class equipments infrastructures. Our Science & Technology centre employs engineers and technicians. Microscopy dry time testing & accelerated aging rooms and even an airfield simulation are enable a variety of coating trials to accelerate the product development process.

## OUR PRODUCTS

Amba Safety focuses on developing the road safety products. We manufacture products in compliance with the international Standard fulfilling environmental requirements. Amba Safety manufactures the hot melt thermoplastics road marking material to deliver high quality products. We are ISO 9001:2015 certified and committed to quality maintenance and trade assurance.

Our products are manufactured in compliance with MORT&H, BS 3262:1989, BS EN 1871:2000 and other international standard. Providing to be the most reliable and efficient paint with high visibility duration day and night, also considered to have very less maintenance.

- Alpha Standard
- Alpha Premium
- Alpha ECO
- Alpha Yellow
- Alpha Primer

### OUR GRADERS

- Most 803, 4.2 (MORTH 803)
- BS 3262 : 1989
- BS EN 1871 : 2000
- AASHTO M249

## ALPHA STANDARD

In compliance with Indian and international Road Marking standard, Alpha is considered as the best commercial grade. This is used in all surfaces and is very effective for city traffic, roads connecting to Highways and for rural urban roads. Alpha always promises to deliver the best result of whiteness and brightness.

### KEY FEATURES

- Goods Reflectivity
- Quick Drying Time
- Skid Resistance
- Cost Effective
- Eco Friendly

ALPHA™

# DROP-ON GLASS BEADS

Solid glass beads for additional surface reflectorisation comply with the class 'B' requirements of BS 6088, We recommend that surface spreading of glass bead should be a minimum quantity of 250 gm. / sq. mt.

Anti Glare Board is used to solve the glare of the headlights which can be a huge factor to blind the drivers & cause accidents.

These help improve traffic safety and also could beautify the highway landscape. Anti-Glare screens on the roads are road sections with dangerous & sharp turns, accidents at dusk & at night, unfavorable terrain.

## ANTI GLARE BOARD

Model : AC-AG-100 | Height : 600 mm / 900 mm

## GUARDRIAL REFLECTOR

Guardrial Reflector are used on the side of W Beam, Box Beam, Bridge Approaches, Hills, Curves along the highway.

Model : AC-B-101

Available : HIP, DG & EGP

Model : AC-B-102

Available : Reflector

Model : AC-B-103

Available : HIP, DG & EGP

## MEDIAN MARKER

Model : AC-MM-01

Model : AC-MM-02

Model : AC-MM-03

NEW

Model : AC1001

Size : 100mm x 88mm x 15mm

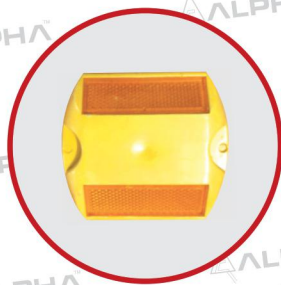

Available Colours :

Model : AC1002

Size : 115mm x 81mm x 17mm

Available Colours :

Model : AC1003N

Size : 100mm x 88mm x 15mm

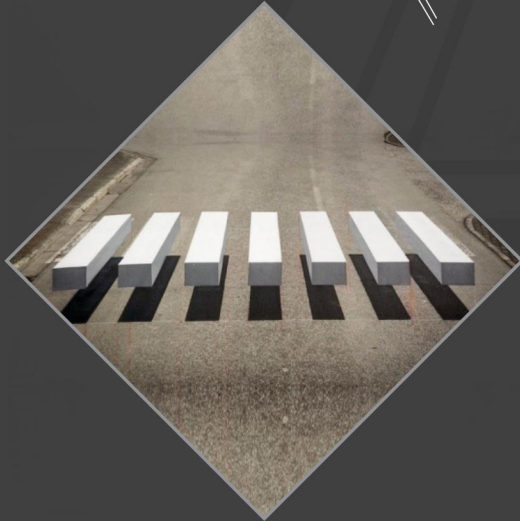

Available Colours :

## CRASH BARRIER

The metal beam crash barriers are manufactured in India as per the guidelines issued by MORTH, AASHTO-M-180, IRCSP-119, MASHTI3 & MASHTI4. The international guidelines/manuals on W-beam which would conform to EN 1317 Part-1&2 can be adopted.
